 Heathland Corridor

Targeted removal of diseased larch trees in riparian zone maintaining where possible healthy canopy layer.

Early felling to facilitate the transition to open heathland in support of efforts to protect the ASSI and commitments to our UNESCO biosphere status.

Removal of increasing wind damaged area adjacent to highway and car park.

## 10 Yr Species

- |               |                 |
|---------------|-----------------|
| 10 Yr Species | SS              |
| B/MC MB/MC    | MB              |
| OL            | Management Zone |
| NBL           | Colden          |
| OG            | Tholt-e-Will    |
| MC            |                 |

Veteran trees and standing deadwood will be buffered by new native broadleaf planting.

Severely checked areas will be restored to 'Heath' type habitat to link ASSI, designated heath areas and wildlife sites.
